#### **REPORT SUMMARY**

- 1. The Integrated Performance Monitoring Report (IPMR) recommends Cabinet note progress and summarises performance outturns against the Council's key priorities for Quarter 1 2016/17, including seven HR-related indicators. Of the 24 key performance indicators 10 (42%) are on target, 7 (29%) are just short and 7 (29%) are off target.
- 2. Table A4 in Appendix A summarises the KPIs which have declined since the previous quarter and more detail is provided about causes and interventions to improve performance in these areas is in paragraphs 5-11.

#### 1. DETAILS OF RECOMMENDATIONS

**RECOMMENDATION:** That Cabinet:

i. Note the progress made against the performance measures listed in the IPMR Quarter 1 2016/17 report.

#### 2. REASON FOR RECOMMENDATION(S) AND OPTIONS CONSIDERED

#### Improving the council's performance management framework

- 2.1 The council is developing its performance management framework which includes re-thinking the format, style and content of the Integrated Performance Monitoring Report (IPMR). This will improve service delivery and the council's ability to achieve all of its strategic objectives.
- 2.2 For this iteration, the Cabinet Outcomes Tracker has been removed from the IPMR but will henceforth be tracked by services and Lead Members and could also be subject to Overview & Scrutiny through the council's traditional channels. The Financial Savings Tracker is no longer reported as requested by Corporate Management Team (CMT) since this is already reported in the financial update. The Q2 2016/17 report will go further to improve our performance management framework.

#### **Report summary and structure**

- 2.3 Of the 24 key performance indicators 10 (42%) are on target, 7 (29%) are just short and 7 (29%) are off target.
- 2.4 The report highlights performance whether good or bad and details mitigation actions to address weak performance. Appendix A provides a summary of all performance and commentary and analysis on KPIs that are falling "just short" or are "off target". Appendix B provides detailed progress on the 24 KPIs but also the secondary indicators, information on key strategic risks, and updates on key corporate projects.
- 2.5 The council has acknowledged that off target KPIs, are not necessarily failures or problems, but signal that an intervention may be required to ensure that the performance measure achieves the Cabinet's expected outcomes or is sufficiently delivering against the council's strategic priorities to be brought back on track. Appendix B seeks to summarise this in the 'comments section' setting out:
  - Work in progress
  - Issues
  - Success
  - Intervention required.

#### **Review of KPIs**

- 2.6 KPIs are predominately designed to measure how effective the council is at providing services to residents and delivering its strategic priorities. Some measures also focus on how the council manages its internal operations to ensure it is operating efficiently.
- 2.7 At the beginning of the new financial year 2016/17, each Directorate reviewed their balanced scorecards to prioritise the key performance indicators they need to monitor. Rationale behind the changes include sharpened focus on delivering the council's strategic objectives, prioritising areas in need of improvement over those with a track record of consistently performing well and using data that more accurately tracks outcomes for residents. As a result the following indicators have been removed from the IPMR:

- AS5 % of Support Plans completed within 28 calendar days of assessment.
- CS85 Number of families supported early (by Children's Centres and Youth Support) to prevent escalation and referral to social care
- SG3 Stability of placements (number of moves) of children in RBWM's care lasting two or more years
- SG30 Total number of approved RBWM foster carers available
- 2.8 The following indicator has been elevated from the secondary set of indicators to become a KPI for closer monitoring:
  - CS80 % of all RBWM schools inspected by Ofsted receiving 'Good' or 'Outstanding' judgement.

#### Current performance

2.9 A summary of current performance against the 24 KPIs is as follows:

|                    |          | 2016/17  |          |          |          |

#### Table 1: KPI Summary of performance

2.10 The key indicators are those measures Cabinet prioritised for improvements in 2016/17. Secondary indicators, whilst still important, are monitored with a lighter touch by team managers and Heads of Service. If performance of a secondary indicator drops below acceptable levels, a process of escalation is triggered and the indicator moves from secondary to a key indicator (see 2.7).

#### Table 2: KPIs off target

| IPMR Page<br>Number | Key Performance Indicator  |

| 3                   | CS78 Number of families supported through Troubled Families        |

2.11 Table 2 above illustrates the 7 KPIs that are off target in Q1 2016/17. Appendix A provides a user-friendly summary of the KPIs including information on actions services are taking to bring the measures in Table 2 back on track (see Appendix A: Table A4). Appendix B provides the comprehensive detail on KPIs, secondary indicators, risks and key corporate projects including all the data.

2.12 Appendix B the full IPMR report, is set out as follows:

- Dashboard page 1
- Key performance indicators pages 2 13
- Key strategic risks pages 14 16
- Secondary Performance indictors pages 17 22
- HR section details performance against 7 key HR indicators, pages 23 27
- Project summary report pages 28 33

#### Table 3: Options

| Option   | Comments   |
|--|--|
| The council doesn't produce a corporate IPMR.<br>This is not recommended   | Production of a performance report is<br>necessary to ensure that the Council is making<br>sufficient progress in meeting its strategic<br>priorities.   |
| The council produces an IPMR<br>that sets out performance<br>against key indicators to help<br>deliver better outcomes for<br>residents by improving service<br>delivery.<br><b>This is the recommended</b><br><b>option</b> | A lack of rigorous performance management<br>and failure to produce a report would result in<br>Senior Officers lacking the necessary data to<br>manage departmental performance. Residents,<br>Members and (in particular) key committees,<br>including Overview and Scrutiny, Audit<br>Performance and Review and Cabinet would<br>not be able to understand and scrutinise the<br>effectiveness of council decision making and<br>delivery of the council's priorities. |
| The Performance Management<br>Framework continues to be<br>improved to deliver better<br>outcomes for residents by<br>improving service delivery.<br>This is the recommended<br>option                                       | Residents will be able to more clearly<br>understand the performance of the council and<br>its progress to achieve the ambitions and<br>outcomes set out in the Corporate Strategy.<br>Officers will be better equipped to understand,<br>manage and deliver service improvements.   |

## 4. FINANCIAL DETAILS

### Financial impact on the budget

4.1 There are no direct financial implications arising from the recommendations in this report. Weak performance in some KPIs may have indirect financial implications which are managed within existing budgets.

### 5. LEGAL IMPLICATIONS

5.1 There are no direct legal implications arising from this report.

### 6. VALUE FOR MONEY

6.1 Performance management ensures the council retains focus on delivering services efficiently and effectively to provide value for money.

#### 7. SUSTAINABILITY IMPACT APPRAISAL

7.1 The report includes monitoring against one key performance indicator where the Council encourages households within the Borough to improve recycling: CCA02 Percentage households waste sent for reuse, recycling, energy recovery and composting (see page IPMR 9).

#### 8. RISK MANAGEMENT

#### Table 5: Risk Management

| Risks   | Uncontrolled<br>Risk | Controls  | Controlled<br>Risk |

## KPIs that are off target

Seven KPIs (equivalent to 29%) are off target (compared to 20% in the same 5. period last year). The council will continue to focus on improving the performance for all KPIs that are off target (please see paragraphs 6 – 12 below for details of the action that has been/is being taken to bring them back on track).

Success

- April: 4.52% (target achieved);
- May: 5.8% (target not achieved);
- June: 7.58% (target not achieved).

June 2016 saw the highest call volumes for 6 years, as a direct result of the EU Referendum and calls received to assist customers with the new Digital Green Waste renewal service. Work is continuing to reduce the unnecessary contact made to allow resources to focus on contact from the most vulnerable customers.

- Bringing performance back on track is a priority.
   During Q1 telephone opening hours were extended from 6pm until 7pm, with Library staff trained to handle
- enquiries after 5pm. This now allows customers increased access to council services by telephone further supporting 24/7 access and more services being delivered through libraries. Also during Q1, the Council's new Digital Channel was launched, allowing customers not only to report enquiries online, but to track progress too. Additional services are being re-designed to be delivered digitally, reducing the number of manual touch points and the volume of telephone calls. This will allow the Council's resources to be focussed on improving and maintaining this target.
- <u>Intervention required</u> Planning and deployment of appropriate resources along with actions to manage demand in advance of known upcoming events that will drive up contact to the Council.

Success:

ntervention required:

81% of schools in the Royal Borough are rated Good or better by Ofsted. A further improvement in performance from the start of the new academic year in September 2016 is

expected which will enable the council to achieve its target of 84% by March 2017.

#### Issues:

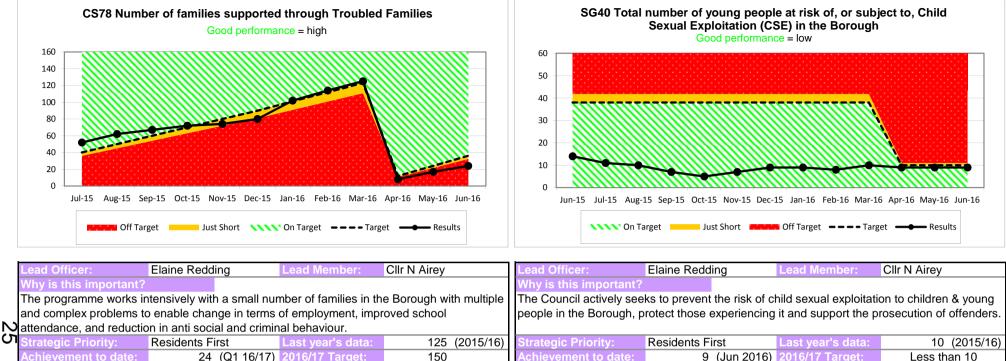

It has been challenging to maintain performance because the number of support plans being completed has increased over last year and there have been staff vacancies, particularly of assessment officers who are primarily responsible for completing support plans.

#### Success:

Consistent performance above target in Q1 2016/17.

#### Intervention required:

Recruitment necessary to vacancies to ensure team able to keep up with demand and meet performance target.

ote: The graph shows **cumulative** data. The target has been set at 150 new families by end of March 2017 (2nd year of 3 years period).

#### Work in progress:

The Intensive Family Support Programme (ISFP) continues to provide the majority of support to families that meet the Troubled Families Criteria. However the formation of the Early Help Hub has meant that the Council is now able to provide extended resources and services to these families and track their progress more easily given that all families referred via the Early Help Hub will have an Early Help Plan. Although performance is currently showing as below the profiled target, working with families is not a straight line trajectory and therefore it is not possible to set a straight profiled target across the year. Evidence over the last two years demonstrates this but the year end target has always been achieved. The Council expect, therefore, to achieve the year end target.

#### Issues

Tracking and collating data continues to be a challenge because it needs to be collected across agencies. However, the Council is in the process of devising a method that will allow us to better track and evidence Payment By Results data.

#### Success:

IFSP worked with 125 new families in 2015-2016 which is slightly above the target set by the Government for the Royal Borough of working with 123 families. IFSP has always achieved against the targets set by the Government.

#### Intervention required:

None.

#### Nork in progress:

lote:

The Missing Persons/Child Sexual Exploitation Operational Panel is a multi-agency panel that monitors on a monthly basis children and young people suspected of being at risk of child sexual exploitation and those who are known to be experiencing it. The Panel has an intervention plan in place for each young person on the tracker to mitigate the risks they are facing.

The graph shows **monthly** data only.

#### ssues:

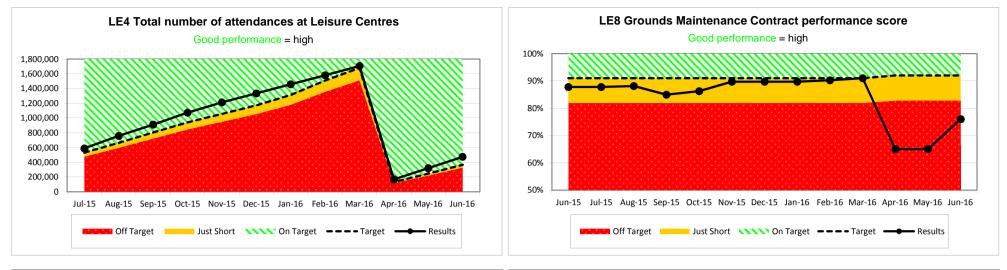

The number of young people on the tracker rose slightly in the last quarter of 2015-2016, giving a cumulative total for the year of 35. As at 31 June 2016, there were 9 young people being actively tracked through the Operational Panel.

#### Success:

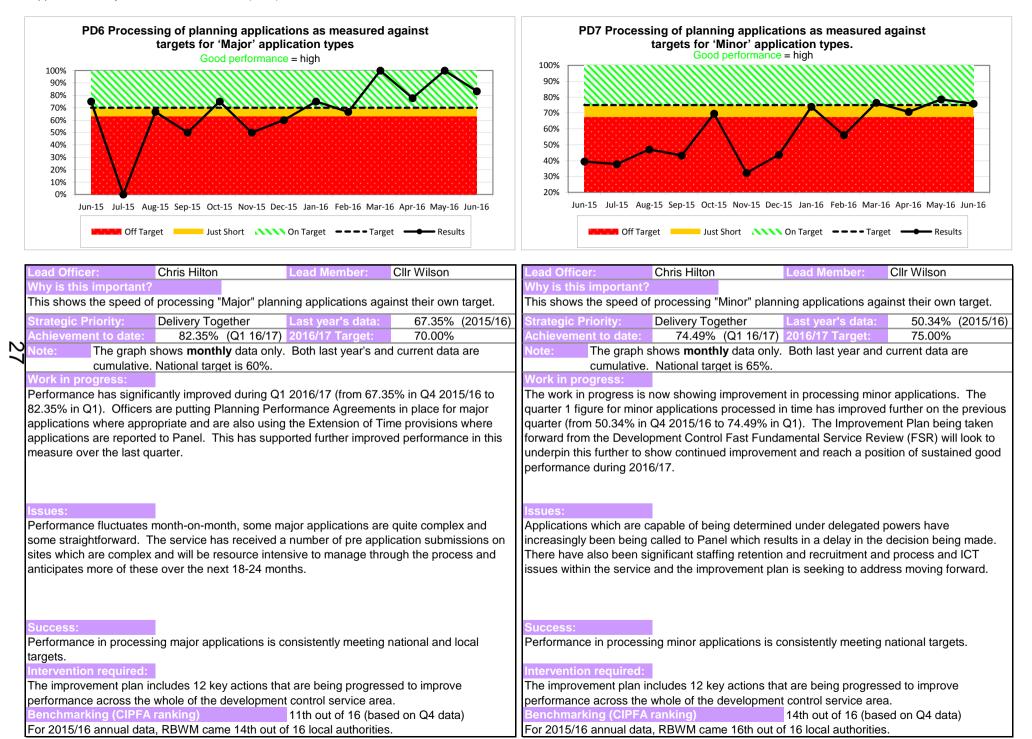

All young people identified on the tracker have a personalised intervention plan in place.

2.900.000

Car park usage for Q1 of 2016/17 is above the target of 725,000 (1.7%). Season ticket sales continue to grow in Maidenhead, especially in Hines Meadow. The steady increase in the use of season tickets enables forward budget planning as income is received up front either on a monthly, quarterly, half yearly or annual basis.

737.381 (Q1 16/17) 2016/17 Target:

Usage figures for 2016/17 includes visits made by those with a season ticket. As the use of season tickets increases the daily usage decreases, however the overall usage was 1.7%

#### 6. Risk Management - Q1 2016/17

The corporate risks for 2016/17 IPMR include all risks under the category 'Key Strategic Risks'. During Q1 2016/17, the following risk has improved its current risk rating:

• CMT0036 (No overall strategic leadership for the Council leads to insufficient forward thinking and hence resource focussing overwhelmingly on the short term) - following the latest review, the risk rating has reduced from 9 (High/Medium) to 6 (Medium) as the probability has been amended from 'Likely' to 'Unlikely'. This is due to CMT changing all the mitigations during April review (numbers 1-7 withdrawn, 8-14 replace). These are all in place and working properly so current risk assessment reduced to controlled position. The seven new mitigations are:

- Directorate leadership structures secures sufficient strategic capacity in the long term planning of services.

- Monthly senior leadership team meeting - undertaking planning and responsive work.

- Senior leaders participating in cross Berks and south east meetings to explore issues for future development and good practice.

- Senior leadership team structures designed with boarder portfolios to secure wider operational understanding of service delivery.

- Internal communications raise awareness of issues and enable officers at all levels to contribute to forward thinking.

- Participation at c/exec meetings across Berks/south east secures input/knowledge on wider strategic issues affecting services.

- Process in place to secure regular political/officer engagement for forward thinking on strategic and operational items.

Although the risk rating has not changed for the remaining risks, there have been progress with certain mitigations for the following risks:

a. CMT0025 (Insufficient staff resources/capacity - That a coherent transformation programme fails to deliver efficiencies, improve service quality and manage organisational change in a controlled manner) - two mitigations have made progress during Q1 2016/17:

 Ensure everyone is aware of the CREATE winning behaviours and working to make sure they are part of everything we do implemented.

- New FSR process rolled out across all directorates to identify service improvements and service delivery options - increased from 25% to 50% progress.

b. FOI0003 (Data integrity and/or data security failure) - one mitigation was implemented during Q1 2016/17:
 - Security awareness of officers and external service providers who use our IT. Gaps on induction and annual refreshing.

c. HSG0007 (Adult social care demographic) - three new mitigations added during Q1 2016/17:

Public health is part of RBWM delivery arm and works closely to support to prevention agenda - added and implemented.
 Assess effectiveness of current set of date set reports, assisted by Head of Commissioning and Performance Team Manager - added and approved during Q1.

- Enhance transitions panel data to inform a more strategic role in future adult care service requirements and commissioning - added and approved during Q1.

As part of its risk management strategy, the Council is using the current risk appetite framework to illustrate defined parameters around the level of risk that is acceptable to the Council and the thresholds which trigger escalation, review and approval by authorised officers. Management can concentrate on the risks where the current assessment is furthest from the stated risk appetite, providing a live radar of the main risk issues. There are 13 risks where the rating is 6 or above. The table below shows the number of risks for each risk appetite:

| Appetite      | Number |
|---------------|--------|
| Low           | 5      |
| Low / Medium  | 1      |
| Medium        | 7      |
| Medium / High | 0      |
| High          | 0      |

For FOI0003 (Data integrity and/or data security failure), the risk appetite was amended from Low to Medium during Q1 2016/17. Data security mitigations were moved into this risk from elsewhere on the risk register and removed any mitigations relevant only to technical security matters. Following all this it became apparent that the appetite was low but the controlled assessment medium. Therefore, no matter what the Council do, they cannot achieve the appetite position. It was decided that making appetite medium was more accurately reflective of the situation.

Members are briefed on the risks falling in their portfolios on a regular basis. A new methodology for Lead Members is being trialled to further refine understanding of the main messages arising.

There is a further rating of high/medium on the heat map. This avoids potentially damaging risks being overlooked by being grouped within the medium criteria banding.

### Key Strategic Risks (in order of risk rating from high to low)

This report provides detailed information on the following pages.

Note: The Risk Team will work with all Directorates during future reviews to ensure that all mitigations meet SMART criteria.

#### Appendix B - Secondary Indicators

### **Performance Indicators - secondary indicators**

This shows a secondary set of indicators where monitoring of performance is important and where reporting may become necessary at a particular point in time (for instance underperformance over consecutive quarters). All figures are cumulative unless stated.

It might also be important to note<br>that the average age of clients over this period was a<br>full 2 years above levels seen for the previous 12<br>months, whilst the percentage of deaths was lower<br>than normal.   |
| Number of permanent admissions to residential or nursing care 65+ made in a year.  |               | Adults,<br>Culture &<br>Health<br>Services | 150          | Less than<br>150  | 35                |                  |                  |                  | Y    | This indicator is actually based on the number of permanent admissions, rather than the rate per 100,000. But as it has such a long maturation<br>period (60 Days), it takes a long time to see<br>improvements in practice and procedures reflected.  |
