Our audit explained	5
Significant risks	6
Control observations	9
Purpose of our report and responsibility statement	11

02 Appendices

Audit adjustments	13
Fraud responsibilities and representations	16
Independence and fees	17

Introduction

The key messages in this report

Audit quality is our number one priority. We plan our audit to focus on audit quality and have set the following audit quality objectives for this audit:

- A robust challenge of the key judgements taken in the preparation of the financial statements.
- A strong understanding of your internal control environment.
- A well planned and delivered audit that raises findings early with those charged with governance.

We have pleasure in presenting our final report to the Corporate Overview & Scrutiny Panel of Royal Borough of Windsor & Maidenhead (the "Panel") for the 2019 audit of the Royal County of Berkshire Pension Fund (the "Fund"). The scope of our audit was set out within our planning report presented to the panel in April 2019.

Status of the audit – Pension Fund

At the date of issue of this report, our audit is in progress. We present a list of remaining items on the next slide.

As noted in our July paper, this is our first year auditing the Fund and we understand that the level of information we have requested from officers and nature of some of our procedures have been quite different to what the Fund has experienced in previous years.

The progress of the audit in the key areas of testing has been significantly delayed due to issues in the reporting of service organisations and advisers. On investigation the convertible bond was being held at cost and had not been included at fair value in the initial draft accounts and the longevity hedge had been valued using an out of date mortality assumption. Both these issues required additional valuation work by the Fund's service organisations before our internal specialists could begin to test the revised valuations. Furthermore, the investment manager, Local Pensions Partnership ("LPP"), has found it difficult to provide the requested information for our testing of the alternative investment funds. This included audited financial statements of the funds and evidence of capital movements, without which it is not possible for us to conclude on our testing. There is currently information outstanding for six funds, along with several general queries across subsections of the alternative funds population.

Our work in respect of the convertible bond and the longevity hedge has now been concluded. We identified material misstatements in the statement of accounts presented for audit, such that the value of each instrument was overstated by £34.2m and £40.3m respectively. The final statement of accounts has been adjusted accordingly. We have included a section in this report providing observations arising from the work we have carried out on the areas of significant risk reported to you in our audit planning report. We have also identified recommendations in respect of significant control deficiencies in these areas in the Control Observations section of this report.

Conclusions from our testing

We have set out a summary of misstatements and disclosure deficiencies identified to date in an appendix to this report (see pages 13 to 15). As our audit work on the alternative investments is still ongoing, further misstatements may be identified through the completion of our remaining work. We will provide an oral update in the meeting on any further misstatements identified.

Subject to finalising our remaining outstanding procedures, we expect to issue an unqualified opinion on the Financial Statements of the Fund. We will update the Panel at the meeting if this changes.

Introduction

The key messages in this report (continued)

Audit procedures outstanding

The following audit procedures are ongoing at the time that this report was released:

- Receipt and testing of the outstanding information requested for some of the alternative investment funds;
- Completion of journal entry testing following a revision of our criteria as a result of other audit findings;
- Update of our subsequent events and going concern procedures;
- Completion of our internal quality assurance procedures;
- Finalising the IAS 19 letters following the conclusion of the other outstanding audit matters; and
- Signing of the representation letter.

We will provide a oral update to the Panel at the meeting on the 18 November 2019.

Management representations

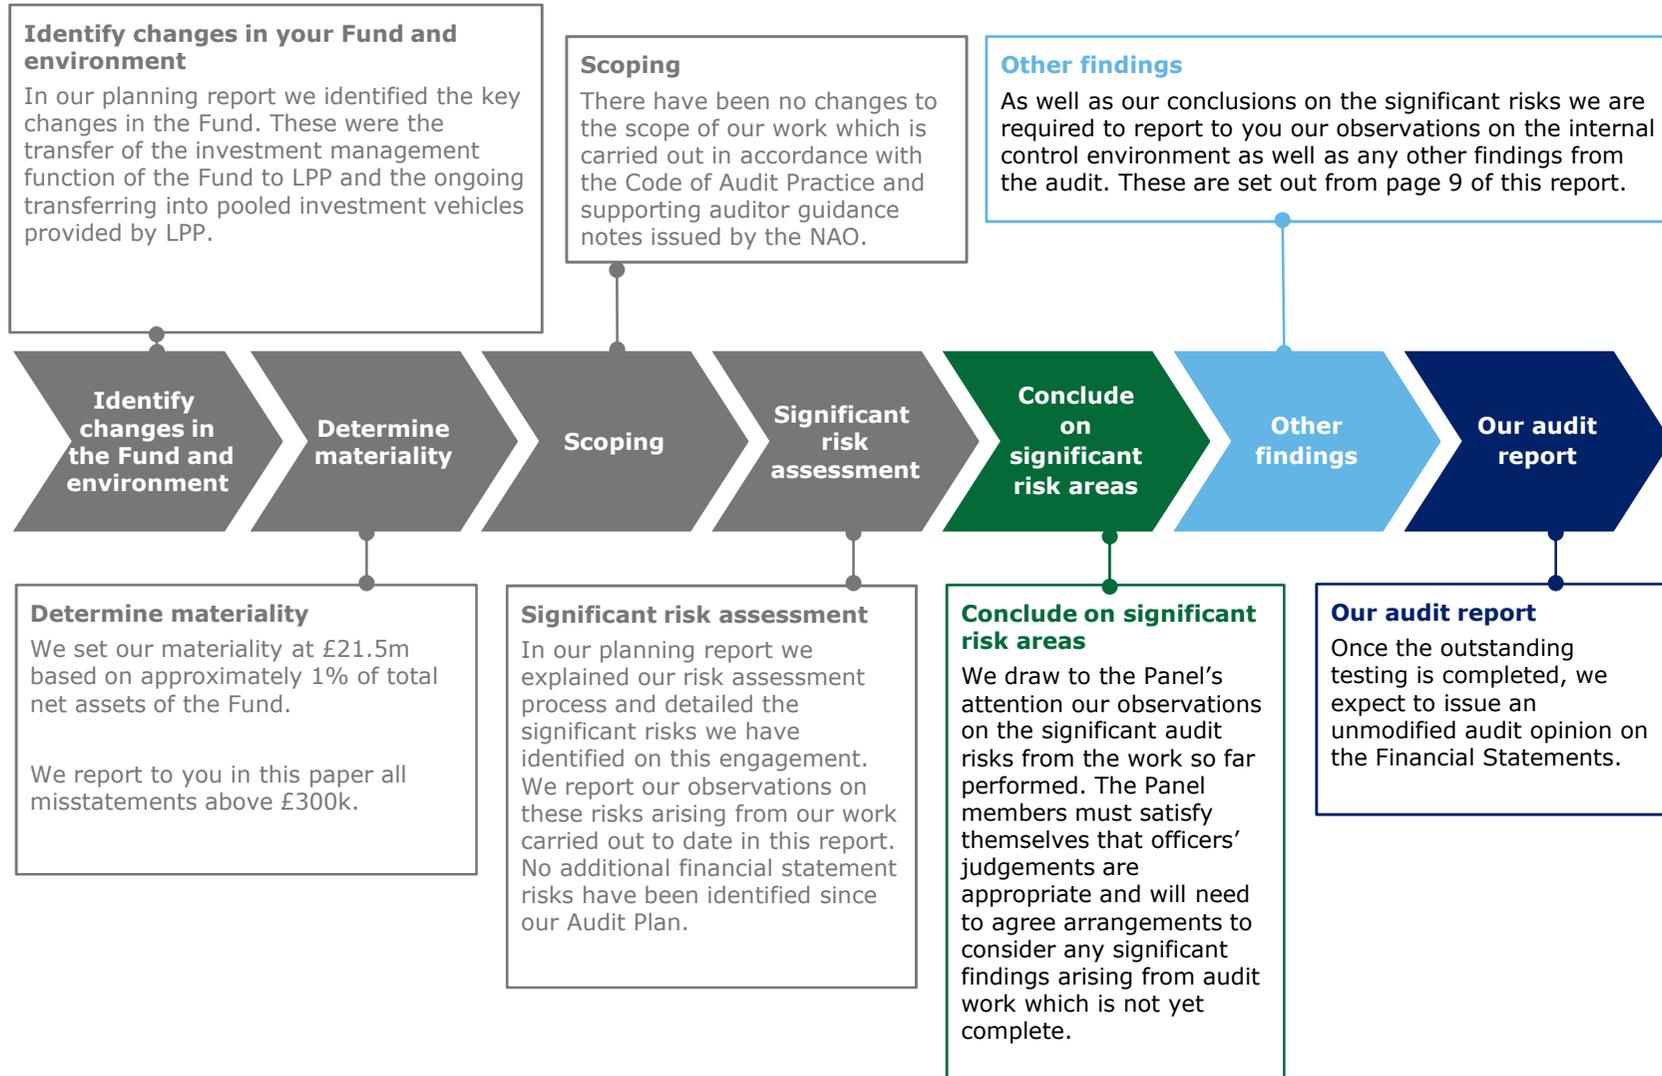

We will obtain written representations from the Chief Financial Officer on matters material to the financial statements when other sufficient appropriate audit evidence cannot reasonably be expected to exist. A copy of the draft representation letter will be issued ahead of signing the financial statements.

Audit fee

As explained in our fee letter, our audit fee is based on assumptions about the scope of our work, the completeness and quality of information provided to support the draft financial statements and the timeliness and quality of responses to subsequent requests for information and explanation. We expected our audit to be complete at this point but, for the reasons set out on the previous page, it is ongoing and has required substantial further input. We have estimated the additional costs incurred to date across the Council and Pension audits in our separate report on the Council statement of accounts. Further time is needed to complete the audit from this point and represents additional cost which will be charged using the rate card in the appendix to that separate report.

Our audit explained

We tailor our audit to your organisation

Significant risks

Management override of controls

Risk identified

In accordance with ISA 240 (UK) management override of controls is always a significant risk. This risk area includes the potential for officers to use their judgement to influence the financial statements as well as the potential to override the Fund's controls for specific transactions.

Deloitte response

We have considered the overall sensitivity of judgements made in preparation of the financial statements, and note that the Fund's draft statement of accounts was overstated by approximately £74.5m due to estimates used in the valuation of the longevity swap and the convertible bond being out of date.

We have considered these factors and other potential sensitivities in evaluating the judgements made in the preparation of the financial statements.

Significant and unusual transactions

We have not identified any significant transactions outside the normal course of business or any transactions where the business rationale was not clear in the current year.

Journals

Elements of our journals testing in relation to the revised journals sample is ongoing. The sample has been revised in light of information discovered during the audit testing.

We have performed design and implementation testing of the controls in place for journal approval.

We have used Spotlight data analytics to risk assess journals and select items for detailed follow up testing. The journal entries were selected using computer-assisted profiling based on areas which we consider to be of increased interest. In response to the initial results of other areas of testing, we reconsidered the selection criteria and tested additional journals.

We have tested the appropriateness of a sample of journal entries recorded in the general ledger, and other adjustments made in the preparation of financial reporting.

Accounting estimates

We have performed a review of the accounting estimates.

The key judgements in the financial statements are those selected as significant audit risks and other areas of audit interest.

We reviewed accounting estimates for biases that could result in material misstatements due to fraud.

We tested accounting estimates and judgements, focusing on the areas of greatest judgement and value. Our procedures included comparing amounts recorded or inputs to estimates to relevant supporting information from third party sources. The findings from our work on the longevity swap valuation and convertible bond valuation are included on pages 9 and 10 of this report.

Status of our work and issues identified

Our work is still ongoing, but, to date:

- We have identified control deficiencies, set out on pages 9 and 10;
- We have not identified any significant bias in the key judgements made by officers based on work performed; and
- We have not identified instances of management override of controls in the current year.

Significant risks (continued)

Valuation of the longevity hedge

Risk identified

The Fund holds a material longevity insurance policy to hedge longevity risk. A longevity hedge is designed to insure the Fund against the risk that pensioners live longer than the current mortality assumptions. Valuation of longevity hedges are sensitive to relatively small movements in the key assumptions used in the actuarial calculations. The setting of these assumptions involves judgement. The longevity hedge was valued as a liability of £63.1m in the 2017/18 Statement of Accounts and £63.5m in the 2018/19 Statement of Accounts presented for audit and is therefore quantitatively material. As a result of this we consider the valuation of the longevity hedge to be a significant risk.

Key judgements and our challenge of them

The Fund held a longevity hedge liability of £63.5m (PY: £63.1m) at 31 March 2019 which is required to be recorded at fair value.

The Fund's practice is to obtain a valuation from the Fund's actuary as at each year end. The actuary also reviews the assumptions relating to the overall Fund's liability on a triennial basis. The most recent triennial valuation was completed as at 31 March 2016.

Key judgements include:

- The discount rates used in discounting the estimated cash flows associated with the instrument; and
- The mortality improvement assumptions

Deloitte response

We obtained an understanding of the approach adopted for the valuation, including assessing the actuary's qualifications, objectivity and independence and reviewing the methodology used.

We obtained a valuation report directly from the actuary and reconciled this to the financial statements disclosure.

We obtained the underlying documentation of the policy, including the population covered, the assumptions and other key inputs used in the calculation, and the agreed cash flows.

An assessment was completed of the design and implementation of key controls in place around the longevity hedge valuation, including how the Fund ensures that the discount rate and mortality rates are appropriate.

Our in-house actuarial specialists challenged and assessed the reasonableness of the valuation of the policy based on the underlying terms of the contract and the forecast cash flows, and provided a view on the key judgements used.

Deloitte view

Following the initial review by our internal specialists we concluded that the mortality assumption was not in line with the market. The mortality tables used were not in line those used in the current valuation of the overall Fund's liability. Aligning the mortality tables with those of the triennial valuation resulted in a revised valuation from the actuary of £104m liability. **This therefore indicates a misstatement in the statement of accounts presented for audit of £40.3m.** Testing of the revised balance has been concluded with no additional valuation issues noted.

We have identified **significant control weaknesses** in this area and made recommendations for management to consider when valuing the longevity hedge in future. Our recommendations have been summarised from page 9.

Significant risks (continued)

Valuation of the convertible bond

Risk identified

The Fund holds a convertible bond as at the 31 March 2019. This instrument is listed on the Singapore stock exchange, but it does not have publicly available pricing. Valuation of convertible bonds requires the use of a complex model that accounts for the embedded option to convert the initial bond holding to equity. The valuation method takes account of the nature of both the bond and equity characteristics, including volatility and spread, and involves the evaluation of discounted cash flows. The convertible bond is quantitatively material in the draft financial statements. As a result we consider the valuation of the convertible bond to be a significant risk.

Key judgements and our challenge of them

The Fund's draft financial statements reflected an investment in a convertible bond of £36.4m (PY: £34.9m) at 31 March 2019 which is required to be recorded at fair value.

The Fund's practice is to obtain a valuation from the Fund's custodian (JP Morgan) as at each year end. The custodian obtains the reporting on this instrument from the Fund's investment manager (LPP). The investment manager is responsible for pricing the instrument.

Key judgements include:

- The estimated ability of the bond issuer to make the interest payments;
- The estimated future value of the equity holding for the converted bond; and
- The discount rate used to discount the future cash flows to calculate the present value.

Deloitte response

We communicated with LPP to identify the valuation methodology adopted and the relevant controls in place to govern that process.

We obtained a valuation report directly from both the custodian and the investment manager and reconciled this to the financial statements disclosure.

We obtained the key details of the convertible bond that have been used by the investment manager to value it.

An assessment was completed of the design and implementation of key controls in place around the convertible bond valuation, including how the Fund assures itself that the estimated future performance of the bond issuer and the discount rate are appropriate.

Our in-house specialists assessed the price of the convertible bond, compared our expectation of the value with that reported by the investment manager and investigated any differences identified that are outside the range of results that we consider to be reasonable.

Deloitte view

Following our initial investigation into the valuation approach adopted by LPP, it was noted that, while other independent third parties were involved in providing pricing information, a valuation of the bond as at 31 March 2019 had not been prepared on a fair value basis. This is a significant deficiency in the preparation of the Statement of Accounts. We therefore requested that a revised valuation be prepared. We raised this issue with management and, subsequently, LPP engaged KPMG to perform the valuation. The resulting valuation report showed that the value of the bond at the year end was approximately £2.2m. **Therefore, this indicates a misstatement of the financial statements presented for audit, of £34.2m.**

Testing of the revised balance by our internal specialists has been completed. No additional adjustments are recommended. It should be noted that the primary reason for the significant drop in value from previous periods is the judgement that the bond issuer will default on interest payments during 2020, and that the remaining assets of the company at that time will have little or no value due to the bespoke nature of the company's operations.

We have identified **significant control weaknesses** in this area and made recommendations for management to consider when valuing the convertible bond in future. The most significant of these have been summarised from page 9.

Control observations

During the course of our audit we have identified internal control findings which we have included below for information.

The purpose of the audit was for us to express an opinion on the financial statements. The audit included consideration of internal control relevant to the preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control. The matters being reported are limited to those deficiencies that we have identified during the audit and that we have concluded are of sufficient importance to merit being reported to you.

Area	Observation
Valuation of the longevity swap	<p>When our specialists challenged the assumptions used in the initial valuation of the longevity swap as prepared by the Fund actuary it was noted that the mortality improvement assumption was out of date. While the assumption had been updated on the most recent triennial valuation of the overall Fund liability, this approach had not been applied to the Fund. When the valuation had been amended on our request, the result was a material change as noted on page 7. From our investigation of the design and implementation of the control around the longevity valuation, it appears that:</p> <ul style="list-style-type: none"> • There is no control specifically around challenging the assumptions used by Barnett Waddingham; and • The broader control around the review of the investment valuations in general had not been implemented for the year end figures. <p>We recommend that the Panel ensures that the valuations provided by the actuary are reviewed and that the assumptions are challenged, understood, and agreed before inclusion of the valuation in the financial statements.</p>
Valuation of the convertible bond	<p>The draft financial statements included a value for the convertible bond as provided by JP Morgan, the Fund custodian. When our internal specialists requested additional details from JP Morgan they were directed to Thomson Reuters for the pricing used in the valuation report. Communication with Thomson Reuters revealed that they were relying on reporting from a broker called Stifel. In subsequent discussions, Stifel confirmed that they were not valuing the bond and were simply providing indicative pricing. We requested that the bond be fair valued and LPP engaged KPMG to prepare a valuation. This KPMG report valued the bond at approx. £2.2m compared with the original value of £36.4m. From our investigation it was clear that:</p> <ul style="list-style-type: none"> • The bond had not been fair valued by anyone involved in pricing the bond; • That there was a lack of understanding at the Fund as to who was providing the pricing and as to the valuation approach adopted; and • There was no control in place at the investment manager to challenge the pricing before it was reported to the Fund. <p>We recommend that the Panel ensures that the valuation of all bespoke investments is understood by the investment manager and that controls are implemented to ensure an appropriate challenge is made of valuations received from any service organisation.</p>

Control observations (continued)

Area	Observation
Valuation of the private equity portfolio and other alternative funds	<p>Our standard testing approach for alternative investment funds includes obtaining the most recent audited financial statements of the investment fund along with information about capital committed and any capital transactions that occurred since the date of the audited financial statements. Obtaining the specific information we require and receiving this in a timely manner has been difficult. We have experienced delays and have been supplied with incorrect or irrelevant information in some instances. While this has directly impacted the progress of this testing, it is also an indicator of an absence of robust controls around these funds.</p> <p>We would expect that the Fund have controls in place based around challenging the valuations and the performance of these funds. Given the difficulties in obtaining this information for the purposes of our audit, it appears that there are inadequate controls to ensure that valuations are challenged and that investment existence is checked as a standard practice.</p> <p>We recommend that the Fund reviews the terms and conditions of its relationship with all investment service providers and seeks assurance that controls are place to ensure that the most recent audited financial statements of each fund, along with the regular capital valuation statements and any evidence of any capital transactions are received and regularly and reviewed in a timely fashion.</p>

Purpose of our report and responsibility statement

Our report is designed to help you meet your governance duties

What we report

Our report is designed to help the Corporate Overview & Scrutiny Panel and the Fund discharge their governance duties. It also represents one way in which we fulfil our obligations under ISA 260 (UK) to communicate with you regarding your oversight of the financial reporting process and your governance requirements. Our report includes:

- Results of our work on key audit judgements and our observations on the quality of your Annual Report.
- Our internal control observations.
- Other insights we have identified from our audit.

What we don't report

As you will be aware, our audit was not designed to identify all matters that may be relevant to the Fund.

Also, there will be further information you need to discharge your governance responsibilities, such as matters reported on by officers or by other specialist advisers.

Finally, our views on internal controls and business risk assessment should not be taken as comprehensive or as an opinion on effectiveness since they have been based solely on the audit procedures performed in the audit of the financial statements and the other procedures performed in fulfilling our audit plan.

The scope of our work

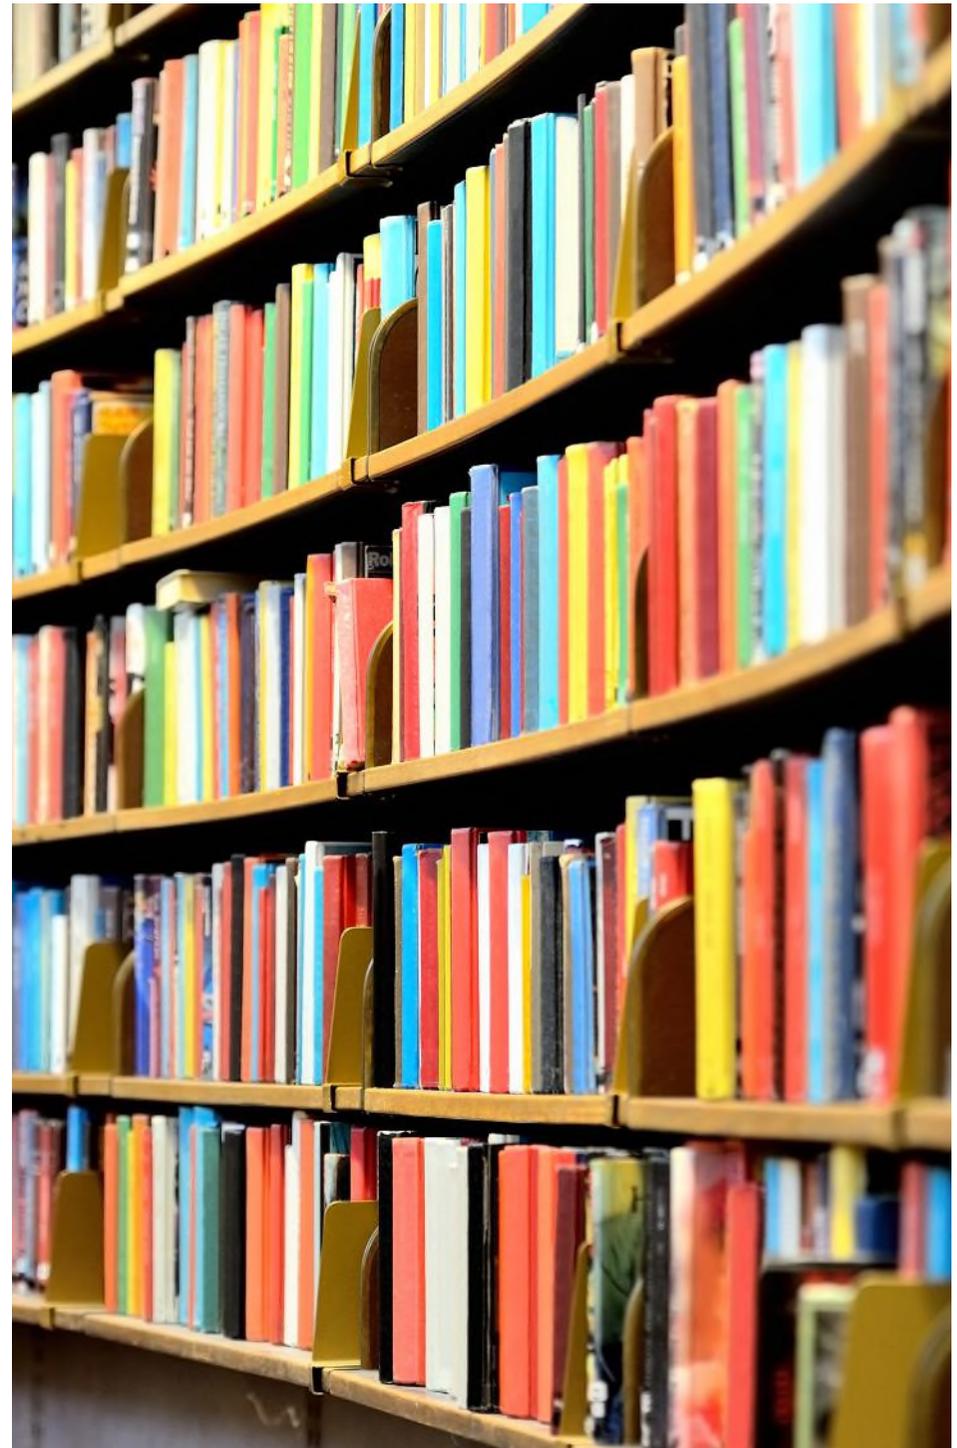

Our observations are developed in the context of our audit of the financial statements. We described the scope of our work in our audit plan and again in this report.

This report has been prepared for the Corporate Overview & Scrutiny Panel and the Fund, as a body, and we therefore accept responsibility to you alone for its contents. We accept no duty, responsibility or liability to any other parties, since this report has not been prepared, and is not intended, for any other purpose.

We welcome the opportunity to discuss our report with you and receive your feedback.

Jonathan Gooding
for and on behalf of Deloitte LLP
St Albans

Appendices

Audit adjustments

Unadjusted misstatements

There are currently no unadjusted misstatements greater than our reporting threshold.

Audit adjustments (continued)

Corrected misstatements

The following misstatements have been identified up to the date of this report which have been corrected by officers. We nonetheless communicate them to you to assist you in fulfilling your governance responsibilities, including reviewing the effectiveness of the system of internal control.

		Debit/ (credit) Fund account £m	Debit/ (credit) in Net asset statement £m	If applicable, control deficiency identified
Misstatements identified in current year				
Revaluation of longevity hedge:	Investment liabilities		(40.3)	Yes
Revaluation of longevity hedge:	Change in market value of investments	40.3		Yes
Revaluation of convertible bond:	Investment assets		(34.2)	Yes
Revaluation of convertible bond:	Change in market value of investments	34.2		Yes
Misstatements identified in prior years				
		-	-	
Total		74.5	(74.5)	

Audit adjustments (continued)

Disclosures

Disclosure misstatements

The following disclosure misstatements have been identified up to the date of this report which officers have corrected.

Disclosure

There are no significant unadjusted disclosure deficiencies in the current draft of financial statements.

As part of our review of the Fund's financial statements we are considering the impact of the McCloud judgement, GMP equalisation and Brexit.

Fraud responsibilities and representations

Responsibilities explained

Responsibilities:

The primary responsibility for the prevention and detection of fraud rests with officers and those charged with governance, including establishing and maintaining internal controls over the reliability of financial reporting, effectiveness and efficiency of operations and compliance with applicable laws and regulations. As auditors, we obtain reasonable, but not absolute, assurance that the financial statements as a whole are free from material misstatement, whether caused by fraud or error.

Required representations:

We have asked the Fund to confirm in writing that you have disclosed to us the results of your own assessment of the risk that the financial statements may be materially misstated as a result of fraud and that you have disclosed to us all information in relation to fraud or suspected fraud that you are aware of and that affects the Fund.

We have also asked the Fund to confirm in writing their responsibility for the design, implementation and maintenance of internal control to prevent and detect fraud and error.

Audit work performed:

In our planning we identified valuation of the longevity hedge, valuation of the convertible bond and management override of controls as key audit risks for the Fund.

During course of our audit, we have had discussions with officers and those charged with governance.

During course of our audit, we have had discussions with relevant officers and those charged with governance.

In addition, we have reviewed officers' own documented procedures regarding fraud and error in the financial statements.

Independence and fees

As part of our obligations under International Standards on Auditing (UK), we are required to report to you on the matters listed below:

Independence confirmation	We confirm the audit engagement team, and others in the firm as appropriate, Deloitte LLP and, where applicable, all Deloitte network firms are independent of the Fund.
Non-audit fees	There are proposed audit related services to be carried out regarding the issuance of assurance letters to the auditors of participating employers. There are no other non-audit fees.
Independence monitoring	We continue to review our independence and ensure that appropriate safeguards are in place including, but not limited to, the rotation of senior partners and professional staff and the involvement of additional partners and professional staff to carry out reviews of the work performed and to otherwise advise as necessary.
Relationships	We have no other relationships with the Fund, its members, officers and affiliates, and have not supplied any services to other known connected parties.

Independence and fees (continued)

	Planned fee £'000s (excl. VAT)
Code audit fee – Pension fund	19 See note 1 below
Total audit	19
Fees for issuing IAS 19 assurance letters to other auditors in respect of participating employers	3 See note 2 below
Total assurance services	3
Total fees	22

1. We have incurred additional costs in our work on the 2018/19 audit due to difficulties and delays in obtaining information and errors identified in the report. Our estimate of the additional costs incurred to date is reported in a separate report on the RBWM statement of accounts. The further time needed to complete the audit from this point all represents additional cost which will be charged using the rate card below.
2. Our fee for issuing IAS 19 assurance letters is £500 per letter. The proposed fee above is on the basis that we have received six letters to date.

Grade	Fee per hour £ (excl. VAT)
Partner/director	132
Senior manager/manager	73
Audit auditor	47
Other staff	36
